

Frequently Asked Questions

How much will the test cost?

Your cost depends on your MyOme Access eligibility, insurance plan, and payment choice. In some cases, you may have an out-of-pocket cost. To keep testing affordable, MyOme offers financial support programs, including prompt-pay discounts and interest-free repayment plans.

What if my insurance denies coverage?

If your insurance does not cover testing, we provide alternatives to lower the cost of testing, including self-pay options and financial support options.

Why did I receive an Explanation of Benefits (EOB)?

Your insurance provider sends an Explanation of Benefits (EOB) when processing your claim. An EOB is not a bill—it simply outlines what your insurance covered and any possible remaining balance. If you have an out-of-pocket cost, MyOme will send you a separate bill.

Have Questions? We're Here to Help.

Our team is dedicated to making the billing process simple and stress-free. If you have any questions about costs, payment options, or financial support, we are happy to assist.

Simplified Billing to Support Rare Disease Diagnosis

Visit us at [MyOme.com](https://www.myome.com)

At MyOme, we believe that everyone deserves access to high-quality genetic testing—without financial uncertainty standing in the way.

Patient-Centric Billing with MyOme Access

Based on the most recent federal guidelines and household income data, our sliding-scale discount model opens the door to affordable testing for the vast majority of U.S. families.

- › **Applicable to nearly every family:** MyOme Access offers discounted genetic testing to ~90% of American households.
- › **Built on fairness and trust:** Discounts are based on clear, federally aligned income tiers, so patients pay what's fair for their financial situation.
- › **Case-by-case compassion:** Each MyOme Access application is evaluated individually, reflecting MyOme's ethical and equitable approach to billing.
